

PREGNANT WOMEN SPONSORSHIP!

PREGNANT WOMEN IN ZIMBABWE have one of the highest mortality rates in the world, ranking 14th out of 183 countries! **ANCIENT WAYS** can intervene on behalf of these women, who carry the future of Zimbabwe,
WITH YOUR HELP!

- ☑ We can pay for their rural hospital stay, which is traditionally the last 3 weeks of pregnancy, so they won't work in the fields and tend the family, but instead can rest. This would typically be the only 3 weeks in her life that a mother would have time away from the fields and family.
- ☑ We can give them pre-natal vitamins for 6 months curbing the unremitting cycle of malnutrition, disease, and early onset of infant ill health. Vitamin A, iron, iodine, zinc and other micro-nutrients prevent death and birth defects.
- ☑ We can deliver in-season fresh fruits and vegetables twice a week for their 3 week stay in the hospital, as the rural hospital provides no food.
- ☑ We can provide you with a picture of the woman, along with a small bio, and a picture of her newborn!
